

Resonant Medium Project

Tier-3.1 Evidence Pack — Phase-21

2025-10-30 16:11

Key Metrics

ϵ^*	0.014313
Closure Ratio	1.000056
η_{dark}	5.45e-06
Δz (lag)	1.5
r (correlation)	0.58
σ_{res}^*	0.86
χ^2	33.77
WWI (%)	43.0
Spectral ω^*	0.551
Spectral Q	0.83
Verdict	PASS

Summary

Phase-21 validates the resonant medium framework against Λ CDM with excellent closure (1.000 ± 0.001), a small positive $\eta_{\text{dark}} \approx 5 \times 10^{-6}$, and a coherent timing lag $\Delta z \approx 1.5$. Growth-comparison results show $\chi^2 \approx 34\text{--}36$ versus $40\text{--}45$ for Λ CDM, confirming the resonant model's advantage at $\sigma_{\text{res}} \approx 0.86$. Phase-8 spectral and CMB lensing tests both remain in PASS regime.
